ABSTRACT

ABSTRACT OF THE DISCLOSURE

A ~~compositive laminate~~ composite laminated substrate applicable for integrated and minimized electronic circuits is composed of ~~at least~~ an inorganic substrate and ~~an~~ at least one organic substrate such as a printed circuit board. The inorganic substrate is embedded with passive components such as resistors, capacitors and inductors. ~~Through the organic substrate (printed circuit boards), outer~~ Outer I/O ports are connected with the passive components of the inorganic substrate through the at least one organic substrate.
